

## The service packages at a glance

Joachim Ulbrich - 2024-10-09 - Product support

With the service package, you benefit from an attractive and uncomplicated warranty extension beyond the manufacturer's warranty if this is less than 24 months. This means that the device is protected for the entire leasing period and you will not incur any costs in the event of a technical defect.

You can also insure yourself against mechanical damage from the Service Package Plus onwards. The Premium service package also covers loss and theft.

To take advantage of this service, contact Smart Support directly. As a dedicom customer, you also have the option of contacting a COMSPOT branch directly with your device. These are being continuously expanded in Germany; you can view the current locations here:
