

Focus on Sustainability: Refurbished iPhones Now Available!

2025-04-01 - Joachim Ulbrich - dedicom News

We are excited to announce that we now offer refurbished iPhones in our shop. These devices are not only a cost-effective alternative to new iPhones but also an environmentally friendly choice.

Why Refurbished?

Purchasing refurbished products actively contributes to sustainability. By reconditioning and reusing electronic devices, we reduce electronic waste and conserve valuable resources. Each refurbished iPhone in our range has had a previous life, typically as a lease return from large corporations. These devices have been carefully inspected and are in excellent condition.

Quality and Warranty

Our refurbishment partner selects only devices that meet the highest quality standards and subjects them to professional testing. Skilled technicians use certified diagnostic software to perform comprehensive checks, including:

Inspection for cosmetic imperfections (e.g., scratches, dents, discolorations)

Testing of full technical functionality, including:

Battery (at least 80% capacity, stress test)

Display (color test, pixel defects, dark spots, white spots)

Processor/CPU

Hard drive/SSD

Memory/RAM

All ports (e.g., Lightning ports)

Touchpad, buttons

Camera (focus, color accuracy)

Connectivity (WiFi, Bluetooth, NFC, cellular)

Microphone and speakers (recording, playback)

Checking for device locks (e.g., MDM lock, BIOS lock, iCloud lock)

Certified and GDPR-compliant data erasure

Reinstallation of the operating system including all necessary, device-specific drivers

Thorough cleaning of all parts

Only devices that pass all checks are offered. The devices are like new and 100% functional. They may show minimal signs of their previous life, such as slight cosmetic wear, which never affects functionality.

Your Benefits at a Glance:

Sustainability: Reduction of electronic waste and conservation of resources.

Quality: Devices in excellent condition.

Warranty: Two-year warranty with easy processing. Batteries are covered by a 12-month warranty. For warranty claims, you can contact the supplier directly. The contact information is included in the shipping box. Please keep the leaflet safe.

Included in Delivery:

Power adapter, used

Charging cable, used

Visit our shop and discover the benefits of refurbished iPhones. Together, we can contribute to a more sustainable future!
